## WHAT IS CLAIMED IS:

product;

1.	A me	thod of conducting a business-to-business online auction for custom
indus	strial pro	oducts or materials between a buyer and a plurality of potential sellers,
com	orising t	he steps of:
	(a)	offering a first and a second lot, defined at least in part by a buyer, to a
		plurality of potential sellers, said first and second lots having at least one

- (b) defining a closing time for said first lot before which bids for said first lot are to be submitted by potential sellers;
- (c) defining a closing time for said second lot before which bids for said second lot must be submitted by a potential seller, said closing time for said second lot being later than said closing time for said first lot by a first time interval;
- (d) receiving bids from potential sellers for said first lot;
- (e) extending said closing time of said first lot by an incremental amount of time upon the occurrence of a predetermined lot extension criterion relating to said received bids; and
- (f) extending said closing time of said second lot if said extended closing time of said first lot precedes said closing time of said second lot by less than a second time interval.
- 2. The method of claim 1, wherein step (e) comprises the step of determining whether a received bid is better than the best of the previously received bids.
- 1 3. The method of claim 2, wherein step (e) comprises the step of determining whether a received bid is the lowest bid.

1	4. The	method of claim 1, wherein step (e) comprises the step of determining if a		
2	received b	d is within a predetermined amount of a preceding bid.		
1	5. The	method of claim 1, wherein step (e) comprises the step of determining		
2	whether a	bid is received within a third time interval of said first lot closing time.		
1	6. The	method of claim 1, further including the steps of:		
2	offe	ring a third lot to the plurality of potential sellers;		
3	defi	ning a closing time for said third lot before which bids for said third lot must		
4	be submitt	ed by a potential seller, said closing time for said third lot being later than		
5	said closin	g time for said second lot by a fourth time interval;		
6	dete	ermining whether said extended closing time of said second lot precedes		
7	said closin	said closing time of said third lot by less than a fifth time interval; and, if so,		
8	exte	ending said closing time of said third lot.		
1	7. A m	ethod of conducting an online auction between a buyer and a plurality of		
2	potential s	ellers, comprising the steps of:		
3	(a)	offering a plurality of lots, defined at least in part by a buyer, to a plurality		
4		of potential sellers, each of said plurality of lots having at least one		
5		product;		
6	(b)	defining a closing time for each of said plurality of lots, wherein a closing		
7		time for a lot defines a time before which bids for the lot are to be		
8		submitted by a potential seller;		
9	(c)	upon the extension of a closing time for a first lot, determining whether a		
10		closing time for a second lot is within a predefined time interval from the		
11		extended closing time of said first lot; and		
12	(d)	if the closing time for said second lot is within a predefined time interval		
13		from the extended closing time of said first lot, extending said closing		

time of said second lot such that the time between the extended closing

16

(d)

15			time of said second lot and the extended closing time of said first lot is at
16			least said predefined time interval.
1	8.	The n	nethod of claim 7, further comprising the steps of:
2			the extension of a closing time for said second lot, determining whether a
3	closi	•	for a third lot is within said predefined time interval from the extended
4		•	of said second lot; and
5		•	closing time for said third lot is within a predefined time interval from the
6	exte	nded clo	osing time of said second lot, extending said closing time of said third lot
7	such	that the	e time between the extended closing time of said third lot and the
8	exte	nded clo	osing time of said second lot is at least said predefined time interval.
1	9.	A me	thod of conducting a business-to-business online auction for custom
2	indu	strial pro	oducts or materials between a buyer and a plurality of potential sellers,
3	com	prising 1	the steps of:
4		(a)	offering a plurality of lots, defined at least in part by a buyer, to a plurality
5			of potential sellers, each of said plurality of lots having at least one
6			product;
7		(b)	defining a closing time for each of said plurality of lots, wherein a closing
8	-		time for a lot defines a time before which bids for the lot are to be
9			submitted by a potential seller;
10		(c)	defining an overtime extension parameter for each of said plurality of
11			lots, said overtime extension parameter indicating a length of an
12			overtime period for an associated lot, wherein an overtime extension
13			parameter for a lot is based upon characteristics of one or more items in
14			the lot;

determining whether an overtime period is triggered in one of said

wA018/4299.1 50

plurality of lots; and

17		(e)	if an overtime period is triggered in said one of said plurality of lots,
18			extending the auction for said one of said plurality of lots by an amount
19			of time defined by said overtime extension parameter associated with
20			said one of said plurality of lots.
1	10.	The r	nethod of claim 9, further comprising the step of storing overtime
2	exten	sion p	arameters for each of said plurality of lots.
1	11.	The	nethod of claim 9, wherein step (e) comprises the step of adding the value
2	of an	overtir	me extension parameter with a market closing time for a lot.
1	12.	The i	method of claim 9, further comprising the step of dynamically varying an
2	overti	ime ex	tension parameter associated with a lot during an auction for the lot.
1	13.	A me	ethod of conducting a business-to-business online auction for custom
2	indus	trial pr	oducts or materials between a buyer and a plurality of potential sellers,
3	comp	rising	the steps of:
4		(a)	offering a lot, defined at least in part by a buyer, to a plurality of potential
5			sellers, said lot having at least one product;
6		(b)	defining a closing time for said lot, wherein said closing time for said lot
7			defines a time before which bids for the lot are to be submitted by a
8			potential seller;
9		(c)	receiving a first bid from a potential seller for said lot;
10		(d)	identifying said first bid as a current best bid;
11		(e)	comparing each successively received bid to said current best bid, and
12			identifying said successive bid as said current best bid if said successive

within a first time interval of said closing time for said lot,

bid is better than said current best bid;

(f)

13

15		(i)	determining whether a received bid is better than said current
16			best bid;
17		(ii)	if said received bid is better than said current best bid, identifying
18			said received bid as said current best bid and extending said
19			closing time for said first lot by a second time interval;
20		(iii)	if said received bid is not better than said current best bid,
21			determining whether said received bid satisfies at least one
22			behind-market bid lot extension criteria; and
23		(iv)	if said received bid satisfies at least one behind-market bid lot
24			extension criteria, extending said closing time for said first lot by a
25			third time interval.
1	14.	The method	of claim 13, wherein said second time interval is equal to said third
2	time	interval.	
1	15.	The method	of claim 13, wherein step (f)(iii) comprises the step of determining
2	whet	her said recei	ved bid is received within a fourth time interval of said closing time.
1	16.	The method	of claim 13, wherein step (f)(iii) comprises the step of determining
2	whet	her said recei	ved bid is within a predefined percentage of said current best bid.
1	17.	The method	of claim 16, wherein step (f)(iii) comprises the step of storing a
2	perc	entage param	eter in memory.
1	18.	The method	d of claim 13, wherein step (f)(iii) comprises the step of determining
2	whet	ther said recei	ived bid is higher than said current best bid by a selected amount.
1	19.	The method	d of claim 18, wherein step (f)(iii) comprises the step of storing a

price distance parameter in memory.

1	20.	The method of claim 16, wherein step (f)(iii) comprises the step of determining
2	wheth	ner said received bid is from an incumbent supplier.
1	21.	The method of claim 20, wherein the step (f)(iii) comprises the step of storing

- 2 an incumbent supplier parameter in memory.
- The method of claim 13, wherein step (f)(iii) comprises the step of determining whether said received bid is within a predefined number of rank ordinal positions of said current best bid.
  - 23. The method of claim 22, wherein step (f)(iii) comprises the step of storing an ordinal position parameter in memory.
  - 24. A method of conducting an online auction between a buyer and a plurality of potential sellers, comprising the steps of:
    - (a) offering a lot, defined at least in part by a buyer, to a plurality of potential sellers, said lot having at least one product;
    - (b) defining a closing time for said lot, wherein said closing time for said lot defines a time before which bids for the lot are to be submitted by a potential seller;
    - (c) within a first time interval of said closing time for said lot, determining if a received bid satisfies at least one behind-market bid lot extension criteria, wherein said at least one behind-market bid lot extension criteria can be satisfied if said received bid is not better than a current best bid; and
    - (d) if said received bid satisfies at least one behind-market bid lot extension criteria, extending said closing time for said first lot by a second time interval.

- 1 25. The method of claim 24, wherein step (d) comprises the step of determining
- whether said received bid is received within a third time interval of said closing time.
- 1 26. The method of claim 24, wherein step (d) comprises the step of determining
- whether said received bid is within a predefined percentage of said current best bid.
- 1 27. The method of claim 26, wherein step (d) comprises the step of storing a
- 2 percentage parameter in memory.
- 1 28. The method of claim 24, wherein step (d) comprises the step of determining
- whether said received bid is higher than said current best bid by a selected amount.
- 1 29. The method of claim 28, wherein step (d) comprises the step of storing a price
- 2 distance parameter in memory.
- 1 30. The method of claim 24, wherein step (d) comprises the step of determining
- whether said received bid is from an incumbent supplier.
- 1 31. The method of claim 30, wherein step(d) comprises the step of storing an
- 2 incumbent supplier parameter in memory.
- 1 32. The method of claim 24, wherein step (d) comprises the step of determining
- 2 whether said received bid is within a predefined number of rank ordinal positions of
- 3 said current best bid.
- 1 33. The method of claim 32, wherein step (d) comprises the step of storing an

2 ordinal position parameter in memory.

WAN1R/4299 1

1	34.	A bido	ting method in an auction between a buyer and a plurality of potential
2	selle	rs, comp	prising the steps of:
3		(a)	receiving initial line item bids for individual line items in a lot of products,
4			at least one of said initial line item bids including a locked portion and an
5			unlocked portion;
6		(b)	calculating an initial lot bid price using said initial line item bids;
7		(c)	receiving an adjustment to the total bid for a lot;
8		(d)	calculating line item price adjustments using said lot bid adjustment,
9			wherein line item price adjustments are made on a pro rata basis to the
10			unlocked portions of said initial line item bids; and
11		(e)	calculating an updated lot bid price using said line item adjustments.
1	35.	The r	nethod of claim 34, wherein step (c) comprises the step of receiving
2	infor		representing a price adjustment for said initial lot bid price.
1	36.	The n	nethod of claim 34, wherein step (c) comprises the step of receiving

- information representing a percentage reduction in said initial lot bid price. 2
- 37. The method of claim 34, wherein step (a) comprises the step of receiving an 1 initial line item bid for a line item having only a locked portion. 2
- 38. The method of claim 34, wherein step (a) comprises the step of receiving an 1 initial line item bid for a line item having only an unlocked portion. 2
- The method of claim 34, further comprising the step of determining whether 39. 1 said lot bid adjustment exceeds a sum of all of the unlocked portions in said initial line 2 3 item bids.

1	40.	The method of claim 34, further comprising the step of unlocking at least part of
2	a lock	ed portion of a line item bid.
1	41.	The method of claim 34, further comprising the step of storing locked and
2	unioci	ked portions of each of said line item bids.
1	42.	A computer program product for enabling a processor in a computer system to
2	proce	ss bidding information in an auction between a buyer and a plurality of potential
3	seller	s, said computer program product comprising:
4		a computer usable medium having computer readable program code means
5	embo	died in said medium for causing an application program to execute on the
6	comp	uter system, said computer readable program code means comprising
7		a first computer readable program code means for enabling the
8		computer system to receive initial line item bids for individual line items in a lot
9		of products, at least one of said initial line item bids including a locked portion
10		and an unlocked portion;
11		a second computer readable program code means for enabling the
12		computer system to calculate an initial lot bid price using said initial line item
13		bids;
14		a third computer readable program code means for enabling the
15		computer system to receive a lot bid adjustment;
16		a fourth computer readable program code means for enabling the
17		computer system to calculate line item price adjustments using said lot bid
18		adjustment, wherein line item price adjustments are made on a pro rata basis to
19		the unlocked portions of said initial line item bids; and
20		a fifth computer readable program code means for enabling the
21		computer system to calculate an updated lot bid prices using said line item

WA018/4299.1 56

adjustments.

- 1 43. The computer program product of claim 42, wherein said lot bid adjustment is
- 2 a price adjustment in said initial lot bid price.
- 1 44. The computer program product of claim 42, wherein said lot bid adjustment is a
- 2 percentage reduction in said initial lot bid price.
- 1 45. The computer program product of claim 42, wherein a line item bid for a line
- 2 item has only a locked portion.
- 1 46. The computer program product of claim 42, wherein a line item bid for a line
- 2 item has only an unlocked portion.
- 1 47. The computer program product of claim 42, further comprising computer
- readable program code means for enabling the computer system to determine
- 3 whether said lot bid adjustment exceeds a sum of all of the unlocked portions in said
- 4 initial line item bids.
- 1 48. The computer program product of claim 42, further comprising computer
- 2 readable program code means for enabling the computer system to unlock at least
- 3 part of a locked portion of a line item bid.
- 1 49. The computer program product of claim 42, further comprising computer
- 2 readable program code means for enabling the computer system to store locked and
- 3 unlocked portions of each of said line item bids.
  - 50. A bidding method in an on-line auction, comprising the steps of:
- 2 (a) defining a flexible line item decision rule, said flexible line item decision rule
- being created to accommodate a pre-auction bidding strategy relating to one or more
- 4 aspects of a line item portion of a bid for a lot of products;

5 (b) receiving information specifying a bid for a lot of products, said bid including 6 a plurality of line item portions for corresponding line items in said lot of products: 7 (c) receiving information specifying an adjustment to one or more aspects of 8 said bid for said lot of products; 9 (d) analyzing said adjustment to said one or more aspects of said bid for said 10 lot of products based on said flexible line item decision rule to determine a 11 corresponding adjustment to one or more aspects of one or more line item portions of 12 said bid; and 13 (e) effecting said corresponding adjustment to said one or more aspects of said 14 one or more line item portions of said bid based upon the analysis of step (d). 1 51. The method of claim 50, wherein step (a) comprises the step of defining a 2 locked portion and an unlocked portion for one or more line item portions of said bid. The method of claim 51, wherein step (d) comprises the step of calculating line 1 52. item price adjustments using a lot bid adjustment, wherein line item price adjustments 2 3 are made on a pro rata basis to the unlocked portions of the line item portions of said 4 bid. A method of conducting a business-to-business online auction for custom 1 53. industrial products or materials between a buyer and a plurality of potential sellers, 2 3 comprising the steps of: offering a lot, defined at least in part by a buyer, to a plurality of potential 4 (a) 5 sellers, said lot having at least one product; 6 (b) setting a bidding status for said lot to a first bidding status indicating that the buyer will accept bids from the potential sellers on said lot; 7 8 receiving bids from potential sellers for said lot; (c) 9 upon closing of said lot, changing said bidding status for said lot from (d)

said first status to a second status indicating that the buyer will not

3

WA018/4299.1

11			accept bids from a potential seller on said lot of products but that said
12			bidding status may be subsequently changed to said first bidding status;
13		(e)	determining whether a return to open trigger event has occurred within a
14			predetermined time period following the changing of said bidding status
15			from said first status to said second status;
16		(f)	if said return to open trigger event has not occurred, setting said bidding
17			status to a third bidding status indicating that the buyer will no longer
18			accept bids from the potential sellers on said lot of products; and
19		(g)	if said return to open trigger event has occurred, returning said bidding
20			status for said lot to said first bidding status.
1	54.	The n	nethod of claim 53, wherein step (e) comprises the step of receiving a
2	com	nunicat	tion from a potential seller indicating a request for an opportunity to submit
3	a fur	ther bid	i.
1	55.	The r	nethod of claim 53, wherein step (g) comprises the step of returning said
2	biddi	ing stati	us for said lot to said first bidding status after auctions on other lots have
3	close	ed.	
1	56.	The r	method of claim 53, further comprising the steps of:
. 2		storir	ng a first value that specifies the length of time that said lot will remain in
3	said	second	I bidding status; and
, 4		storir	ng a second value that specifies whether said lot should automatically be
5	char	nged to	said third bidding status upon the expiration of the length of time specified
6	by s	aid first	value.
1	57.	A me	ethod of conducting a business-to-business online auction for custom

industrial products or materials between a buyer and a plurality of potential sellers,

59

comprising the steps of:

4		(a)	offering a lot, defined at least in part by a buyer, to a plurality of potential
5			sellers, said lot having at least one product;
6		(b)	defining a closing time for said lot before which bids for said lot are to be
7			submitted by potential sellers;
8		(c)	setting a bidding status for said lot to a first status indicating that the
9			buyer will accept bids from potential sellers of said lot;
10		(d)	determining whether an auction pausing event has occurred;
11		(e)	if an auction pausing event has occurred, changing said bidding status
12			for said lot from said first status to a paused status indicating that the
13			buyer will not accept bids from the potential sellers on said lot and that
14			all existing bids for said lot are preserved;
15		(f)	altering said closing time for said lot during said paused status for said
16			lot; and
17		(g)	changing said bidding status for said lot from said paused status to said
18			first status once said auction pausing event has been corrected.
1	58.	The	method of claim 57, wherein step (d) comprises the step of receiving a
2	notifi	cation	from a potential seller.
1	59.	The	method of claim 57, wherein step (f) comprises the step of receiving input
2	from	an aud	ction coordinator that identifies an alteration in said closing time.
1	60.	A me	ethod of conducting a business-to-business online auction for custom
2	indu	strial p	roducts or materials between a buyer and a plurality of potential sellers,
3	com	prising	the steps of:
4		(a)	offering a plurality of lots, defined at least in part by a buyer, to a plurality
5			of potential sellers, each of said plurality of lots having at least one
6			product;
7		(b)	defining an opening and a closing time for each of said plurality of lots:

8	(c)	determining whether an auction pausing event has occurred;
9	(d)	if an auction pausing event has occurred, changing said bidding status
10		for at least one of said plurality of lots to a paused status indicating that
11		the buyer will not accept bids from the potential sellers on said lot and
12		that any existing bids for said lot are preserved;
13	(e)	altering at least one of said opening time and said closing time for at
14		least one of said plurality of lots during said paused status for said lot;
15		and
16	(g)	changing said bidding status for said lot from said paused status to a
17		second status once said auction pausing event has been corrected.

- 1 61. The method of claim 60, wherein step (c) comprises the step of receiving a notification from a potential seller.
- 1 62. The method of claim 60, wherein step (d) comprises the step of changing said 2 bidding status from an available status to a paused status.
- 1 63. The method of claim 60, wherein step (d) comprises the step of changing said 2 bidding status from an open status to a paused status.
- 1 64. The method of claim 60, wherein step (d) comprises the step of changing said
- 2 bidding status from an extended status to a paused status.
- 1 65. The method of claim 60, wherein step (d) comprises the step of changing said 2 bidding status from an overtime status to a paused status.
- 1 66. The method of claim 60, wherein step (e) comprises the step of receiving input
- from an auction coordinator that identifies an alteration in said closing time.

2

3

4

5

6

7

8

9

10

11

12

- 1 67. The method of claim 60, wherein step (e) comprises the step of altering an opening time or a closing time for each of said plurality of lots.
- 1 68. The method of claim 60, wherein step (f) comprises the step of changing said 2 bidding status from a paused status to an available status.
- 1 69. The method of claim 60, wherein step (f) comprises the step of changing said 2 bidding status from a paused status to an open status.
- 70. The method of claim 60, wherein step (f) comprises the step of changing said bidding status from a paused status to an extended status.
  - 71. A method of conducting an online auction for custom industrial products or materials between a buyer and a plurality of potential sellers, comprising the steps of:
    - (a) setting an individual bid ceiling for each of a plurality of potential sellers, wherein an individual bid ceiling for at least one of said plurality of potential sellers is different from an individual bid ceiling for another of said plurality of potential sellers;
    - (b) receiving bids from one or more potential sellers;
    - (c) determining whether a received bid for a potential seller is greater than a corresponding individual bid ceiling for said potential seller; and
  - (d) if said received bid is greater than said individual bid ceiling for said potential seller, communicating to said potential seller that said received bid is invalid.
- 72. The method of claim 71, wherein step (a) includes the step of setting an individual bid ceiling based on price discovery prior to the start of the auction.

1	73.	The method of claim 71, wherein step (a) includes the step of setting an		
2	indivi	dual bi	d ceiling based on the potential seller's previous offline bid.	
1	74.	A me	thod of conducting an auction, comprising the steps of:	
2		(a)	setting an individual bid floor for each of a plurality of potential bidders,	
3			wherein an individual bid floor for at least one of said plurality of potential	
4			bidders is different from an individual bid floor for another of said plurality	
5			of potential bidders;	
6		(b)	receiving bids from one or more potential bidders;	
7		(c)	determining whether a received bid for a potential bidder is less than a	
8			corresponding individual bid floor for said potential bidder; and	
9		(d)	if said received bid is less than said individual bid floor for said potential	
10			bidder, communicating to said potential bidder that said received bid is	
11			invalid.	
1	75.	The	method of claim 74, wherein step (a) includes the step of setting an	
2	indiv	idual b	id floor based on price discovery prior to the start of the auction.	
1	76.	The	method of claim 74, wherein step (a) includes the step of setting an	
2	indiv	idual b	id floor based on the potential bidder's previous offline bid.	
1	77.	A me	ethod of conducting an online auction between a plurality of bidders,	
2	com		the steps of:	
3		(a)	offering a lot, defined at least in part by an originator, to a plurality of	
4			potential bidders, said lot having at least one product;	
5		(b)	receiving a bid from a bidder for said lot, said bid being confirmed by	
6		` '	said bidder prior to submission;	
7		(c)	determining whether said bid price on said lot passes at least one bid	

failsafe criteria, said at least one bid failsafe criteria incorporating

2

9		system-based intelligence to determine whether said bid price on said lot			
10		is a permissible bid in view of previously received bids; and			
11		(d) if said bid price on said lot fails said at least one bid failsafe criteria,			
12		implementing a pre-defined consequence that is associated with said at			
13		least one bid failsafe criteria.			
1	78.	The method of claim 77, wherein step (c) comprises the step of comparing said			
2	bid price to a previous bid by said bidder.				
1	79.	The method of claim 78, wherein step (c) comprises the step of determining			
2	whether said bid price is within a predefined percentage of a previous bid by said				
3	bidder.				
1	80.	The method of claim 77, wherein step (c) comprises the step of comparing said			
2	bid price to a historical lot price.				
1	81.	The method of claim 80, wherein step (c) comprises the step of determining			
2	whether said bid price meets a threshold defined by a historical lot price.				
1	82.	The method of claim 77, wherein step (c) comprises the step of comparing said			
2	bid price to a market leading bid price.				
1	83.	The method of claim 82, wherein step (c) comprises the step of determining			
2	whet	whether said bid price is within a predefined percentage of a market leading bid price.			
1	84.	The method of claim 77, wherein step (d) comprises the step of preventing said			

64 WA018/4299.1

bid price from being submitted.

1	85.	A method of conducting an auction between a plurality of bidders, comprising		
2	the steps of:			
3		(a)	offering a lot, defined at least in part by an originator, to a plurality of	
4			potential bidders, said lot having at least one product;	
5		(b)	defining a closing time for said lot, wherein said closing time for said lot	
6			defines a time before which bids for the lot are to be submitted by a	
7			potential bidder;	
8		(a)	receiving bids from potential bidders for said lot;	
9		(p)	determining whether an erroneous bid has been submitted by a bidder;	
10		(c)	if an erroneous bid has been submitted, deleting in real-time an	
11			erroneous bid and any consequential bids of said erroneous bid from the	
12			auction; and	
13		(d)	communicating with potential bidders that said erroneous bid and said	
14			consequential bids have been deleted from the auction.	
1	86.	The	method of claim 85, wherein step (b) comprises the step of receiving a	
2	com	mmunication from a bidder that a submitted bid is in error.		
1	87.	The method of claim 85, wherein step (c) comprises the step of deleting bids		
2	from	the auction based upon input from an auction coordinator		

- 1 88. The method of claim 85, wherein step (d) comprises the step of causing a
- 2 message dialog box to be displayed to the potential bidders.
